

# ZYLIA ZM-1 driver

## macOS 10.13

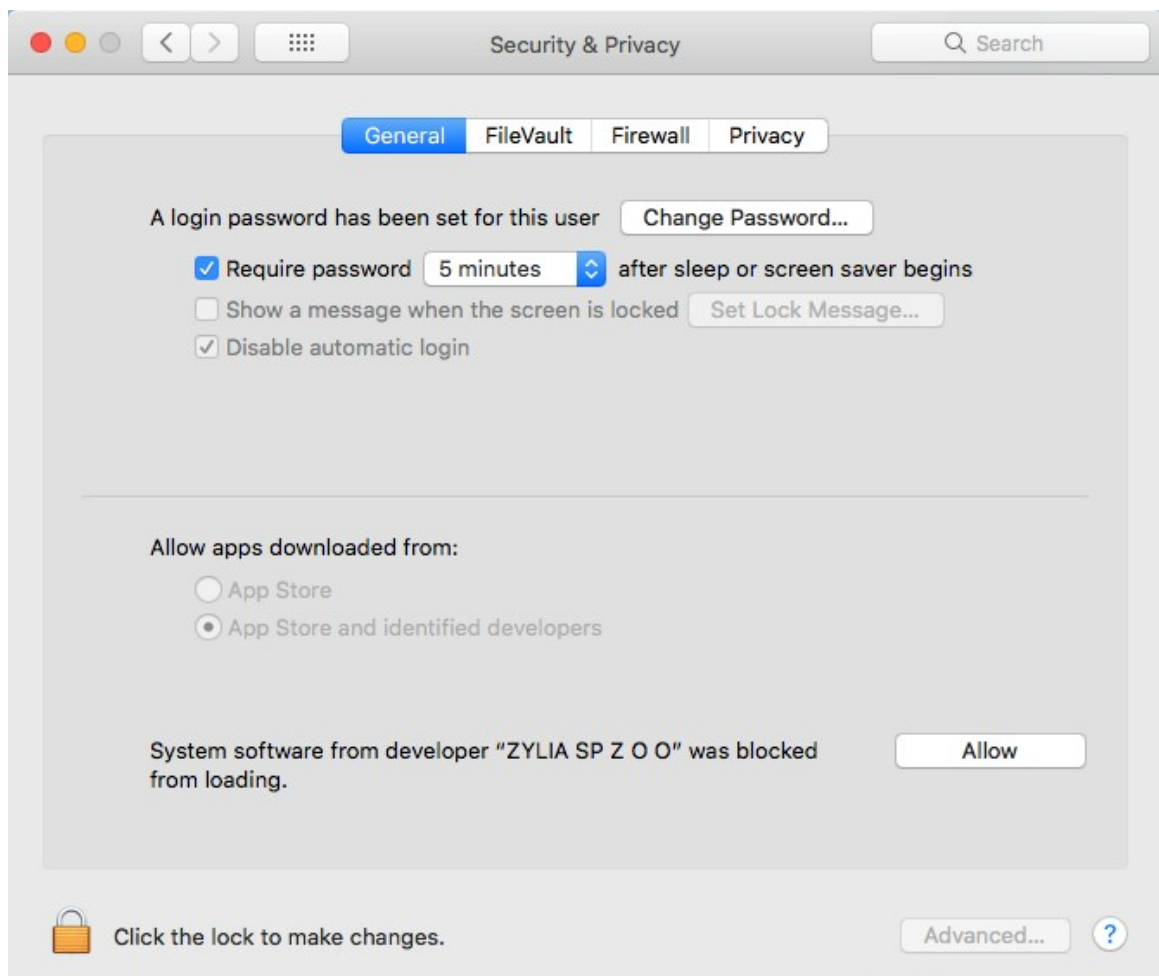

Installation instruction

Due to macOS 10.13 High Sierra security and privacy settings you should allow ZYLIA ZM-1 driver to load during installation. It is highly recommended to close all other applications before installation.

### Instruction:

1. Close all running applications (they may affect installation process)
2. Run ZYLIA ZM-1 installer package
3. Follow the instructions
4. After installation, when you receive the message "System reboot required", postpone the reboot
5. Open System Preferences Security and Privacy
6. Click "Allow"

7. Reboot your system

**Important**  
**"Allow" button disappears after 30 minutes from the installation and after the system reboot.**
