Due to macOS 10.13 High Sierra security and privacy settings you should allow ZYLIA ZM-1 driver to load during installation. It is highly recommended to close all other applications before installation.

## Instruction:

- 1. Close all running applications (they may affect installation process)
- 2. Run ZYLIA ZM-1 installer package
- 3. Follow the instructions
- 4. After installation, when you receive the message "System reboot required", postpone the reboot
- 5. Open System Preferences Security and Privacy
- 6. Click "Allow"
